

PLAY.OWN.DEVELOP.TRADE.

LET'S BUILD →

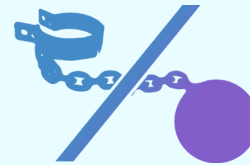

LootSafe is a platform that establishes real, immutable ownership of virtual goods and empowers developers to easily create, deploy, and manage items that can travel between games.

Platform Ready
User friendly integration

Quantum Inventories
Cross platform. Game to game, player to player

Non-Restrictive
Publish your game on any platform

Full Engine Support
Support for all popular gaming engines

- Limited avenues of monetization
- Hours of developer time spent building proprietary solutions
- Cross-platform functionality can be difficult and expensive to implement
- Difficult to maintain trust and loyalty with players

+ The Lootsafe Solution

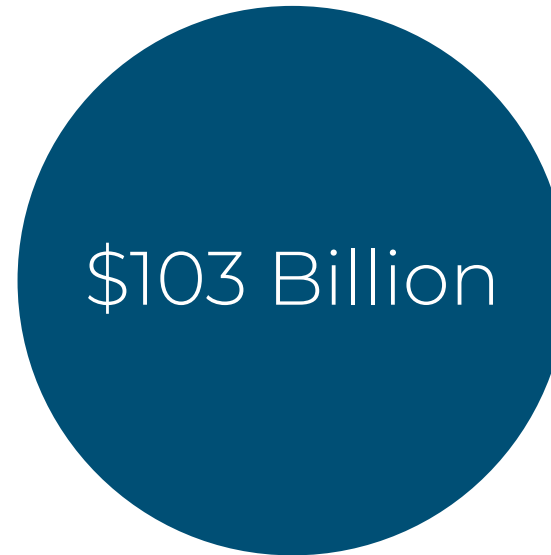

- Prebuilt tools and packages to easily implement
- Cross platform, cross game, cross server
- Use any programming language
- Save on cost/time

Virtual Assets Market

Video Game Market

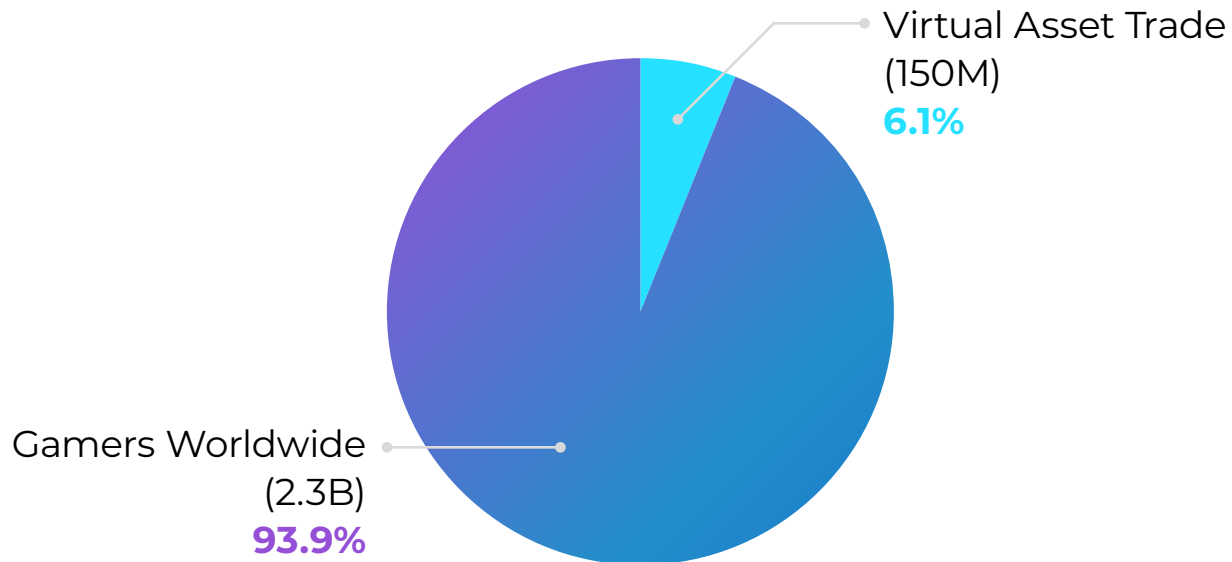

Gamers spend more than **\$80 billion a year**
on in-game purchases.

A decentralized platform for gamers to exchange items is a **virtually untapped opportunity**.
